

I must drive 100 miles a day in th LA area! The traffic service that XM radio is supplying is not matched by any local on air radio. If you do not reject the NAB petition 04-160 I will be lost in traffic jams... No over the air radio could

match this service, they are talking about trafic 24/7. Also XM is not public radio I am paying for this private service and as a result the FCC has no right to block it!!!
